PROFESSIONAL SUMMARY	Frontend Engineer with 4 years of experience developing web applications using React.js, Next.js, and TypeScript across fintech, AI, healthcare, and blockchain domains. Experienced in frontend architecture, authentication, subscription and payment integration, and complex data-driven interfaces. Served as frontend technical owner across multiple projects, with additional hands-on experience in React Native, backend integration, and deployment.	
EXPERIENCE	Software Developer – SOTATEK., JSC	May 2023 – Present
	- Served as frontend technical owner and core developer across 7+ web and mobile projects in various business domains. - Designed and maintained scalable frontend architectures using React, Next.js, TypeScript, and modern state management solutions. - Developed complex features including authentication, real-time data, payment integrations, and Web3 functionalities. - Collaborated with cross-functional teams to deliver features, resolve production issues, and support deployment processes.	
	Frontend Web Developer – Thu Do Multimedia	Jun 2022 – Nov 2022
	- Developed a DRM demo platform using React, TypeScript, Redux, Material UI, and Webpack. - Built responsive interfaces with reusable components, dark mode, and state management. - Gained hands-on experience with Git workflows, frontend design patterns, and team collaboration.	
SKILLS	Core: Javascript, Typescript, React, Next.js, Vue.js, React Native, Expo Styling: Tailwind, Shadcn/ui, Ant Design, Material UI, Chakra UI, GSAP, Reanimated Data & integrations: Axios, Redux Toolkit, RTK Query, Zustand, Tanstack Query Backend & DB: Node.js, NestJS, PostgreSQL, MongoDB Integrations: MetaMask, Ethers.js, Wagmi, Mapbox, Firebase Push Notification, Socket.io Additional: Git, Docker, CI/CD, Agile/Scrum, Jira, AI Tool (Claude, Codex)	
EDUCATION	Hanoi University of Science and Technology (HUST)	Oct 2019 – Jun 2024
	- Bachelor of Engineering in Computer Engineering - GPA: 3.23/4.0 (Very good)	
SELECTED PROJECTS	Nijinn — Prediction Market Intelligence	
	Lead Frontend Developer Team size: 14 (4 Frontend)	
	- Tech: Next.js · Shadcn/ui · Zustand · TanStack Query · Lightweight Charts - Contributed to the frontend codebase and implemented email/password and Google authentication using AWS Cognito, along with account settings. - Developed Free/Pro subscription flows with Stripe integration, Pro dashboard, market detail, and event interfaces. - Web (Production): https://pioneer.nijinn.io	
	Partnerweek – B2B Reward Platform	
	Frontend Developer Team size: 8 (3 Frontend)	
	- Tech: Next.js · Shadcn/ui · Zustand · Tanstack Query · Monorepo - Developed SEO-friendly landing page and user site. - Implemented profile management, NFT transfer flows and admin module for membership operations; supported email and wallet authentication. - Web (Production): https://partnersweek.com/en	
	Mina – Bridge Token Blockchain	
	Lead Frontend Developer Team size: 8 (3 Frontend)	
	- Tech: Next.js · Redux Toolkit · Chakra UI · GraphQL · Web3 - Led the frontend migration from React to Next.js, restructuring the application into a modular and maintainable architecture. - Integrated MetaMask and Auro wallets, Ethereum–Mina bridge flows, multi-step verification, transaction status and history across user/admin dashboards. - Github: https://github.com/sotatek-dev/mina-bridge-fe-user	

Awayday — Healthcare Event Platform

Frontend Developer / Team size: 8 (3 Frontend)

- Tech: Next.js • TypeScript • Ant Design • Mapbox • SuperTokens
- Owned frontend implementation across user and admin portals, including AI-assisted event discovery, filtering and map-based exploration.
- Implemented role-based authentication, social login, notifications and Firebase Analytics tracking.
- Web (Staging): <https://staging.awayday.co>

ADDITIONAL MOBILE EXPERIENCE

Zenia – APEC Hotel Booking App

Lead Mobile Developer / Team size: 24 (5 Mobile)

- Tech: React Native • Reanimated • Firebase Push Notification • SSO
- Served as lead mobile developer for iOS/Android hotel booking.
- Built Google, Apple and biometric sign-in; hotel search, reservation and booking-history flows.
- Integrated crypto, Stripe and ePay payment flows, token rewards, push notifications and English/Vietnamese localization.
- Investigated and resolved rendering lag and app crashes; handled iOS/Android build configuration, manual test builds and release preparation.
- App (Staging): <https://dply.me/v2a9xa> | <https://testflight.apple.com/join/8urUbyyK>

TierHub – Blockchain-based Seafood Traceability App

Mobile Developer, Frontend Developer / Team size: 12 (3 Mobile, 2 Frontend)

- Tech: React Native • TypeScript • Google Maps • QR/NFC
- Developed cross-platform mobile flows for blockchain-based product traceability in the Australian market.
- Implemented QR/NFC scanning and verification journeys, multi-role authentication, supplier maps, localization and notifications.
- Contributed to a product released for iOS and Android, with complementary Next.js web features.
- App (Production – Download iOS/Android): <https://tierhub.com.au>
- Website (Production): <https://web.tierhub.com.au/>

Spiderweb — Fan Community App

Mobile Developer / Team size: 8 (2 Mobile)

- Tech: React Native • Reanimated • TanStack Query • Zustand • i18next
 - Developed cross-platform mobile features for a fan-community and e-commerce application using React Native and Expo.
 - Built Home, Community, and Shop experiences, including artist discovery, content feeds, media interactions, product catalog, cart, checkout UI, and order history.
 - Implemented multilingual support using i18next and react-i18next for English and Japanese.
-
